PROFESSIONAL SUMMARY

Fullstack Developer with 8 years of experience across the .NET, Node.js, and React.js ecosystems, specializing in robust, scalable solutions for the finance and e-commerce sectors. Expertise in developing APIs for critical domains such as Threat Intelligence and Fraud Detection, from backend architecture to frontend implementation, with a focus on performance, security, and AWS CI/CD practices.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, C#, .NET Core, .NET Framework, Node.js, React.js, Next.js, Tailwind CSS, Razor

Databases: SQL Databases, MongoDB

Cloud & DevOps: AWS, CI/CD pipelines, API Gateway, Git, REST APIs, Microservices

Domains: Threat Intelligence, fraud detection, fintech, e-commerce and payment systems.

AI Tools: Claude Code, GitHub Copilot, Cursor.

Languages: Portuguese (native) | English (professional proficiency)

PROFESSIONAL EXPERIENCE

Mid-level Fullstack Developer Sep 2025 – Present

Serasa Experian | Remote, Brazil

- Develop frontend features with React.js for the ThreatX (Threat Intelligence) product, continuing the platform originally built at ClearSale following the Serasa Experian acquisition.
- Contribute to backend development in Node.js and .NET, supporting fraud and threat-detection workflows.
- Leverage AI tools including GitHub Copilot with internal MCPs and Claude Code to accelerate delivery on more complex tasks.

Mid-level .NET Developer Aug 2022 – Sep 2025

ClearSale S.A. | Remote, Brazil

- Developed and maintained the Threat Intelligence product in Node.js and React, collecting and analyzing fraud, phishing, fake ads, and other e-commerce attacks. Joined in 2022 via Beta Learning, later acquired by ClearSale.
- Built and maintained innovative APIs in the Payments squad using BNPL (Buy Now Pay Later) and PISP (Payment Initiation Service Provider) technologies.
- Maintained ClearSale's billing system, provided to multiple marketplace companies.

Mid-Level .NET Developer Mar 2020 – Aug 2022

Zup IT Innovation | Remote, Brazil

- Developed backend services in .NET for Itaú Unibanco as part of the Zup team.
- Served as the team's API Owner, owning the entire CI/CD process of the API Gateway hosted on AWS.

Junior .NET Developer Aug 2019 – Mar 2020

DTI Digital | Belo Horizonte, MG, Brazil

- Developed APIs in .NET Core for BS2 Bank, building backend solutions consumed by the frontend team for the BS2 Bank mobile application.
- Maintained a legacy internal BS2 system using .NET Framework and Razor.

Junior Software Developer Sep 2017 – Aug 2019

Rumo IT Solutions | Belo Horizonte, MG, Brazil

- Started as an Intern Developer and was subsequently hired as a Junior Developer, allocated to a payroll loan bank.

PERSONAL PROJECTS

Gasolinha — www.gasolinha.com.br

Founder & Developer

- Built a SaaS through an AI-first development workflow (using Claude Code) for vehicle fuel tracking, where drivers log each refueling (odometer, liters, cost) and the app automatically calculates fuel efficiency and keeps a complete history per vehicle.
- Designed the product around a real pain point: replacing manual, error-prone fuel logging in notebooks with automated calculations and consumption trends.
- Owned the full stack end to end (Next.js, Typescript, Supabase, Vercel), from database and authentication to production deployment on a custom domain.

EDUCATION

Bachelor's Degree in Computer Science 2019 - *UnBH*
